Commodity markets continued on the upswing this week. OSB curtailments in Western Canada last week goosed the market off the bottom in the U.S. West. Southeastern markets did not see the same level of enthusiasm on OSB, though. SPF and DF rose again for the second week, and SYP narrows found a trading level as well. Weather in Texas and the SE muted the follow through in those markets. Jobs got covered heavily this week, but there's still a question as to how long this uptick may last.
