Prices are F.O.B. mill, excluding freight

The market upswing that has been mainly in the southern and Mid-Atlantic regions pushed through to other markets and species. SYP, which has been on a roll, caught more momentum and saw large price gains. By midweek DF in both dry and green also began to move as construction has restarted in California. OSB and plywood also saw price gains as the supply of open market wood has largely dissipated. If you need something fast, you'll likely be disappointed.
