Prices are F.O.B. mill, excluding freight

Supply tightened even further this week as neither mills, wholesalers, or distributors could keep up with the robust demand. Across the country panels continue to be the toughest items to source. Availability issues are not limited to commodity lumber. Fiber cement, engineered wood products, and many other specialty items boast long lead times. Wintery weather across the country is unlikely to change market dynamics much as producers have lengthy order files to lean on. Customers who have waited to buy in hopes of price relief are now scrambling to cover needs at higher prices and finding that lack of availability is leading to delays. Its hard to imagine but the reality is setting in that we will likely see higher prices all the way into summer.
