Prices are F.O.B. mill, excluding freight

Availability, or lack thereof, continues to be the dominant concern in the marketplace. One EWP producer announced late last week that they would increase price in the 30-60% range, adding to the harried tone in the construction world. Lumber and stud prices continued to climb this week, even as winter storms slowed the pace in much of the country. OSB and plywood are showing no signs of relief, either. If it's related to construction, you can bet it's higher and tighter than Tom Brady's haircut these days. Speaking of which, it's the GOAT versus the Kid on Sunday. Who ya' got?
