Composite Average	1,140	-227	470

Lumber and studs remain in a strong downward correction this week across the board. Buyers continue to keep purchases at bare necessity. Secondaries continue to be more price friendly as they move to get out of their positions. Then there is the enigma that is the panel market. While plywood has begun to show some cracks, OSB remains at or near the peak- but here again secondaries are cutting deals. Watch for transportation snaggles to increase as we near the holiday weekend ahead.
