4X8 23/32 OSB T&G	620	0	1950
Composite Average	624	01	1,484

Someone forgot to tell mother nature that it's time to ease up on the wet weather across most of the country. Prices were mixed again this week. While the overall tone remains sluggish, most mills are trying to hold their pricing up on quotes. SYP producers seem to be having the most success doing so, along with Green Doug Fir. Meanwhile, SPF pricing deteriorated in both the east and the west. In panels, southern plywood and southern OSB firmed up a touch while the northern tier and the west was a struggle largely based on weather. Any way you slice it, single family construction continues to waffle with affordability issues. Enjoy the Final Four on Saturday and the NCAA Championship on Monday!
