Composite Average	626	03	718

The big news this week was that new housing starts are up 21%. Futures market is climbing and will most likely continue to do so in the short term based on housing starts and the fire situation in Canada.

Several species rose over \$100/m in the last couple of weeks, with DF leading the way.

The SYP market is pretty lackluster but 2x6 and 2x8 will continue to push up. OSB mill curtailments in the South have pushed pricing over the last several weeks, however plywood is weak in most regions.

July 4th is right around the corner and in the middle of the week so trucking and mills will be shutting down for the long weekend, so plan accordingly.
