What little umph that the market had going last week generally faded this week. Green DF narrows and of course some OSB regions ticked up in price, but most everything else was flat as activity dwindled. Buyers seem content with recent inventory purchases and may already be in holiday mode. Look for a quiet finish to this week and a quiet and short week ahead. Canfor did announce a prolonged curtailment in BC, but much more will need to come out before it has a significant impact on the lumber markets. Plywood remains on the same flat track it's been on. Daylight is getting shorter and shorter, adding to the hibernation mode of the market.
